15 Robert St. / 53 Proulx St.

3/16/21

Address

Date

I met Andrew and Jake Kausch
and Paul Archer. They asked me to
look at the wetland on 15 Robert St.

While I was taking photos, the owner's
son approached us, and asked what we were
doing. I asked for his mother's phone number,
which he gave me. The area appears to be
a wetland. There is a drainage pipe outlet that
flows into the area. Water-stained leaves, and
obligate wetland vegetation (Cephalanthus
or "Button Bush") were observed.

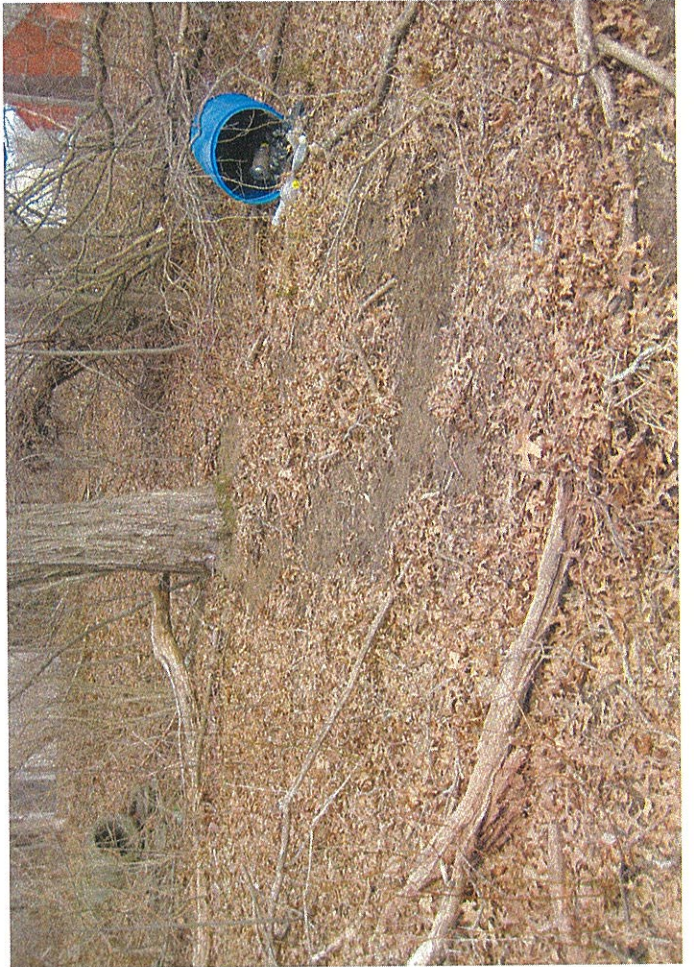

I contacted the owner of 15 Robert Street.
She gave permission in an email for Andrew Kausch
to have the resource assessed by his soil scientist.

Brooklyn, CT 06234

RE: CLA 6802
A. Kausch and Sons
Proulx Street Brooklyn

To the Commission:

CLA Engineers was retained by A Kausch and Sons to delineate off site wetlands proximal to the parcel of land shown on the plan prepared by Archer Surveying LLC titled “ Site Development Plan Prepared for A. Kausch & Sons Proulx Street, Brooklyn, Connecticut, 1 sheet, scale 1”=20’ April 1, 2021. Robert C. Russo C.S.S. delineated the wetlands in March of 2021 per the definition in CGS section 22a.

Based on the existing conditions and proposal development CLA believes that placement of a silt fence barrier, on site, between the proposed development and the inland wetland will be adequately protective of the off-site wetland. The on-site slopes are nearly level and the soils are coarse textured thus the potential for erosion is very low.

Please contact me with any questions.

Very truly yours,

Robert C Russo
