NOTICE OF VIOLATION AND CEASE AND DESIST ORDER

Terence Veazie 117 Tatnic Road Brooklyn, CT 06234

November 30, 2020

Re: Violation of Inland Wetlands Permit for 117 Tatnic Road

Mr. Veazie:

You are hereby required to immediately CEASE AND DESIST from all site work in the Upland Review Area and in the wetlands at your property 117 Tatnic Road (Assessors Map 16/ Lot 84), except for installing sediment and erosion controls (see below).

On 11/26/2020, the abutter downstream of your property emailed me the attached message and photographs. Sediment has clearly moved from your property into the abutter's pond downstream.

On 11/30, I received the email and called you to request that you meet me for an inspection at 11:00 am. When I arrived at the property, the driveway was completely blocked by a backhoe and a "No Trespassing" sign was posted on the gate. Refer to the attached inspection report and photographs.

Refer to the attached plan titled "Revised Wetland crossing Forson Subdivision Prepared for Terrance M. Veazie Tatnic Road Brooklyn, Connecticut" for details of the approved erosion/sediment controls.

The failure to install/maintain erosion and sediment controls as shown on the approved plan is in violation of your IWWC permit, #21107A, issued on 1/8/2008, extended by the Commission on 1/10/2012, extended by the Commission to January, 2022, and transferred

from George R. Forson and Joanne K. Forson to Terrance M. Veazie and Lisa D. Veazie on 11/21/2017.

Refer to the attached copy of the CT Wetlands Statutes, Section 22a – 44(b) which enables municipalities to assess civil penalties for violations.

Refer to the attached copy of Section 6 of the Town of Brooklyn IWWC Regulations, which states that any person violating provisions of these regulations shall be subject to enforcement proceedings and penalties.

Refer to the attached Section 20-2 of the Brooklyn Town Ordinance regarding citation procedures and fines for wetlands violations.

You are hereby required to:

Immediately CEASE AND DESIST from all site work in the Upland Review Area and in the wetlands at your property at 117 Tatnic Road.

Immediately install sediment controls as shown on the attached plan titled "Revised Wetland Crossing Forson Subdivision Prepared for Terrance M. Veazie Tatnic Road Brooklyn, Connecticut".

Call me at the phone number shown below as soon as the silt fence reinforced with hay bales and the 55-foot stone check dam have been installed for a re-inspection.

Attend the Webex IWWC meeting at 6:00 p.m. on Tuesday, December 1, 2020, by using your phone or your computer. Instructions for attending the Webex meeting are on the draft meeting agenda, attached. At that meeting, a hearing will take place to provide you the opportunity to be heard and show cause why the Cease and Desist Order should not remain in effect.

Hello Margaret,

It has been close to a year since we have talked and up until now a quiet one, unfortunately that has ended.

In the past week there has been considerable activity at the Veazie property in what looks like an attempt to trench for his electrical conduit. I have attached pictures of what that work combined with this morning's rain have resulted in, taken at 12:00 noon today.

I know when we last spoke we had discussed the fact he still had to trench through the wetlands crossing at some point for his conduit and you had assured me that the sedimentation controls would be maintained and in place prior to this work, you can see in the pictures and from what is out there, that they appear to have been untouched (down/missing) for a VERY long time - some I would venture to say since they where installed three years ago.

Also, the trenching, if you call it that, has been performed in such a haphazard way that there are spoils material strewn everywhere about driveway and sides of it through the wetlands crossing and upgradient of it this is the material that is ending up in my pond. There is a silt plum that covers approximately 1/4 of the pond on the shallow end that is thankfully being held back somewhat by the cattails growing there - but the last time I checked cattails are not a sediment control device.

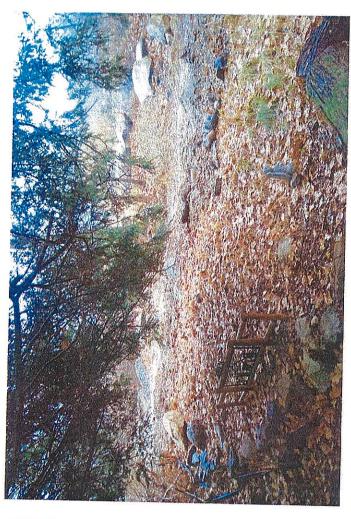

It seems that every time there is earthwork performed on that property I end up paying the price for for the shortcomings of the so called contractor (and there have been many over the last 3 years). The Town goes out and makes him perform some work to make the site marginally acceptable and then we wait until the next time it happens - and it always seem to. The fact he is a homeowner self performing his own work does not alleviate him from the requirements the Town would hold any legitimate contractor to and that is all I have asked for all along. At the last Wetlands meeting I attended (Dec. 2019) it was referenced that this was a feud going on between myself and Mr. Veazie - I did take great offense to this and would point out that everything I have ever brought up has been clearly denoted on the approved plans for this site or as the result of a clear violation of regulation/siltation incident. When I read the Wetlands Meeting Minutes I see where the Town is not shy to issue Cease and Desist orders in some cases, yet with the number of incidents that have happened here you will not?

With more heavy rain predicted on Monday I am hoping you might get this before then and take some sort of action but am am not holding out much hope, I'm sure I will be sending you a new round of photos on Monday.. I would appreciate as soon as you get this that you would reach out to me and explain what the Town will do (again) to correct/mitigate this issue. It seems that this type of work is always planned around a Holiday/long weekends where there is little chance of the Town witnessing first hand or potentially shutting down his work.

I hope that your Thanksgiving was more enjoyable than mine.

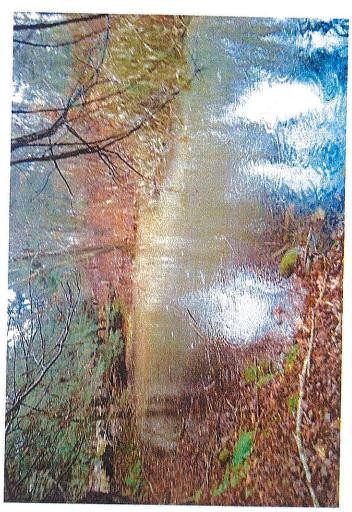

Regards,
