

DEMHS Region 4 Emergency Support Function (ESF) Assets

Regional assets are available for use by emergency management personnel involved in incident command and support; this includes, but is not limited to:

- emergency management directors
- fire and police incident commanders
- communications/dispatch professionals
- public works directors, and
- emergency medical services.

ARE THESE ASSETS AVAILABLE TO US?

Assets may be deployed to support local, regional, or State emergency response and recovery. Assets *may* be available to support communications and safety at non-emergencies, such as large community gatherings or planned major system outages. *Emergencies always take priority for deployment and use.*

WHAT IS THE PROCESS TO REQUEST A RESOURCE?

All requests should be directed to the local emergency management director (EMD) who will coordinate with regional ESF leadership and the DEMHS Regional Coordinator. Know your EMD and Deputy EMD!

HOW DO I GET INVOLVED OR LEARN MORE?

In the State, there are five regions, each with a Regional Emergency Planning Team (REPT) consisting of volunteers covering many emergency management functions.

Your participation is always welcome at whatever level of involvement you can afford. Come to a meeting about a topic that relates to your job or interests.

Learn more about regional assets and activities by emailing the DEMHS Regional Office: demhs.region4@ct.gov.

Join us for an Equipment Rodeo showcasing DEMHS Region 4 ESF Assets:

Tuesday, April 23, 2024

Afternoon Session: 1400-1600 hours

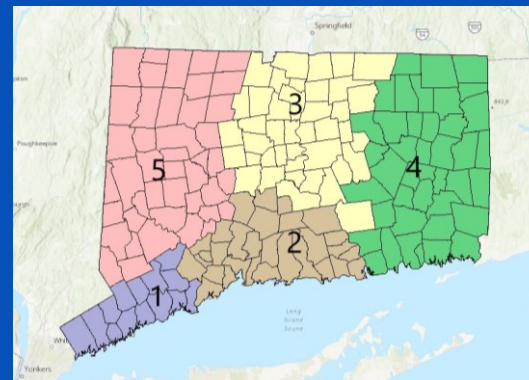

Evening Session: 1800-1930 hours

NOTE: There will be a short pause in access to the rodeo area between sessions to allow a break for equipment hosts.

Access to the rodeo is *included* with registration for the 2024 CT Emergency Management Symposium.

Partners *NOT* registered for the symposium, can register for *just* the rodeo from the calendar:

<https://portal.ct.gov/DEMHS/Emergency-Management/Resources-For-Officials/Training-and-Exercise>.
