

BROOKLYN HOUSING PLAN

2022-2027

Prepared by the

Town of Brooklyn

with assistance from the

Northeastern Connecticut Council of Governments

The Brooklyn Housing Plan was created in accordance with Connecticut General Statutes
Section 8-30j with a grant from the Connecticut Department of Housing
Affordable Housing Plan Technical Assistance Program.

The Town of Brooklyn Board of Selectmen
unanimously approved the
Brooklyn Housing Plan
on May 26, 2022.

Community Values

In the 2011 Plan of Conservation and Development, Brooklyn identified housing as a critical community issue. Now, as part of an update to the Plan of Conservation and Development and in accordance with Connecticut General Statutes Sec. 8-30j, the Town is creating an Affordable Housing Plan to specifically address issues related to the attainability of affordable housing for all residents.

The 2011-2021 Plan of Conservation and Development included the following priorities:

- **To provide opportunities for a variety of housing types, densities, and cost levels,**
- **To pursue environmentally conscious initiatives such as recycling, low-impact development, green building standards, renewable energy, and energy efficiency measures, and**
- **To provide services for elderly, low-income, and special needs residents.**

The 2011-2021 Plan of Conservation and Development recognized that substantial planning efforts must be undertaken to assure that there is an adequate, sustainable mix of housing for all income levels in Brooklyn. The 2011 plan also identified the need to encourage: 1) new development at various income levels and 2) “green” development that has a small environmental footprint and uses sustainable practices and materials.

Now, the Town of Brooklyn is following through on the promise to plan for sustainable, affordable housing that will include the following goals:

- That all residents of the town have reasonable access to housing affordable to them,
- That housing will maintain the historic and rural character of the town,
- That housing development be sensitive to the town’s natural resources,
- That existing housing stock be maintained in good condition,
- That older neighborhoods will be prioritized for revitalization, and
- That opportunities for energy efficiency, renewable energy, clean water, water conservation, composting and recycling will be pursued.

Introduction

What is Affordable Housing?

“Affordable Housing” is defined in the Connecticut General Statutes (Sec.8-39a) as housing for which persons and families pay thirty per cent or less of their annual income, where such income is less than or equal to the area median income for the municipality in which such housing is located, as determined by the United States Department of Housing and Urban Development.

A simple calculation for affordability would include taking the Median Family Income (MFI) for the area where the housing is located, multiple by 0.3 and divide by twelve. For example, the town of Brooklyn is within Windham County which has an MFI for Fiscal Year 21 of \$83,200 30% of which would equal \$27,456. This would calculate out to \$2,288 to be spent on housing costs per month.

Housing affordability is relative to one’s income and ability to pay for a home in a particular location whether it be urban, suburban, or rural. Often families may be willing to pay more to live in a community with better schools and access to other amenities

In their Plans of Conservation and Development, municipalities are required to “consider the need for affordable housing”, specifically “make provision for the development of housing opportunities, including opportunities for multifamily dwellings...” and “promote housing choice and economic diversity in housing, including housing for both low- and moderate-income households, and encourage the development of housing which will meet the housing needs identified in the state’s consolidated plan...”.

In 2017, the Connecticut General Statutes were amended to require communities to create individual affordable housing plans that specify how they will increase the number of “affordable housing developments in the municipality”. An affordable housing development is defined as consisting of either “assisted housing” or “set-aside development”. See box for definitions of these terms.

ASSISTED HOUSING - housing which is receiving, or will receive,

- financial assistance under any governmental program for the construction or substantial rehabilitation of low- and moderate-income housing
- any housing occupied by persons receiving rental assistance.

SET-ASIDE DEVELOPMENT - a development in which

- not less than thirty per cent of the dwelling units will be conveyed by deeds containing covenants or restrictions which
- shall require that, for at least forty years after the initial occupation of the proposed development, such dwelling units shall be sold or rented at, or below, prices which will preserve the units as housing for which persons and families pay thirty per cent or less of their annual income, where such income is less than or equal to eighty per cent of the median income. In a set-aside development, of the dwelling units conveyed by deeds containing covenants or restrictions, a number of dwelling units equal to not less than fifteen per cent of all dwelling units in the development shall be sold or rented to persons and families whose income is less than or equal to sixty per cent of the median income and the remainder of the dwelling units conveyed by deeds containing covenants or restrictions shall be sold or rented to persons and families whose income is less than or equal to eighty per cent of the median income.

Affordable Housing Appeals List

For most of the past 20 years, Brooklyn has been the smallest Connecticut municipality listed as “exempt” on the Affordable Housing Appeals list as outlined in Section 8-30g of the Connecticut General Statutes. To be exempt, at least 10% of the housing units in a municipality must be either assisted housing units or set-aside developments. In 2021, the Town of Brooklyn had 305 housing units that qualify (9.43%).

Brooklyn has had a relatively high percentage of assisted housing units for a small town and this is due to the work of the Brooklyn Housing Authority to build or renovate affordable housing developments in East Brooklyn. These units are located primarily at Salem Village (96), Riverbend Apartments (27), Quebec Square (57), and Tiffany Place (27).

For a housing unit to be counted as a set-aside unit in the State of CT it must be affordable for someone making 80% of the Area Median Income (AMI) and be deed restricted to remain affordable for at least 30 years. Set-aside developments exist on Eric Drive (14) and Kathleen Drive (6) and scattered throughout town. Many of the set-aside units were developed through the work of the Northeastern Connecticut Community Development Corporation.

In 2018, Brooklyn failed to meet the 10% minimum and is no longer exempt from CGS 8-30g affordable housing applications. This shift occurs when the number of total housing units keeps growing but the portion of affordable units meeting the state’s criteria either remains static or declines. Affordable housing applications filed under CGS 8-30g may be located in areas where housing is not currently permitted under existing zoning regulations.

2021 Affordable Housing Appeals List

| 2010 Housing Units | Government Assisted | Tenant Rental | CHFA/USDA Mortgage | Deed Restricted | Total Assisted Units | % Affordable |
|--------------------|---------------------|---------------|--------------------|-----------------|----------------------|--------------|
| 3,235 | 232 | 10 | 63 | 0 | 305 | 9.43 |

2010 Affordable Housing Appeals List

| 2000 Housing Units | Government Assisted | CHFA/USDA Mortgage | Deed Restricted | Total Assisted Units | % Affordable |
|--------------------|---------------------|--------------------|-----------------|----------------------|--------------|
| 2,708 | 244 | 65 | 0 | 309 | 11.41 |

1992 Affordable Housing Appeals List

| 1990 Housing Units | Assisted Family | Rental Elderly | CHFA/USDA Mortgage | Deed Restricted | Total Assisted Units | % Affordable |
|--------------------|-----------------|----------------|--------------------|-----------------|----------------------|--------------|
| 2,440 | 100 | 169 | 61 | 0 | 330 | 13.5 |

As many municipalities in northeastern CT are either too small or lack the resources to increase either assisted or set aside affordable housing developments, residents rely on “naturally affordable” housing units. These units are often privately owned multi-unit development’s with between two and eight units and are contained in one structure or on one lot. Also referred to as middle housing as they fall between the single-family housing and multi-family developments of three or more units normally found in more urban environments.

Process for Developing Plan

Affordable housing is often a contentious topic. People have strong feelings about housing developments in their communities. When a housing development is proposed, apprehension can lead to angry discourse and a breakdown of communications. To address this from the beginning, a communications strategy was developed to focus on community education of affordable housing issues. The strategy culminated in a series of four educational slideshows and two public input surveys that were posted on the Affordable Housing Plan webpage. Due to coronavirus restrictions in place at the time, it was decided to use virtual communications, social media, and print media to raise awareness of housing affordability issues and solicit public opinions.

Brooklyn Housing Plan Communications Strategy

WHO:

Target audience – Residents, people in need of affordable housing,

What do we know about them – Strong opposition to multifamily housing and community change

Secondary audience - Brooklyn boards and officials, housing developers, businesses, future residents

WHY:

Goal- Public support for affordable housing programs and development.

Objective- Educate people about housing affordability and build understanding of the community and social benefits of a more diverse housing profile.

WHAT:

Content- Easy to read, short topic articles; Select statistics that are understandable to everyone; photos of acceptable building types.

- Topic #1 - Is My Housing Affordable?
 - Housing Cost Burden
 - Housing Costs in Brooklyn
 - Median Sales Price
 - Median Income
 - Housing Wage

- Topic #2 – Why Is Housing So Expensive?
 - Housing Market Changes
 - Value vs. Sale Price
 - Coronavirus Impacts
 - Land constraints and Zoning Regulations
 - Competition and Housing Diversity

- Topic #3 - What Does Affordable Housing Look Like?
 - Types of places you have lived
 - Pix of existing housing in town
 - Explanation of housing terms/types
 - Visual preference survey

- Topic #4 – Can Housing Be More Sustainable and Affordable?
 - Water and sewer service areas
 - Transit service areas
 - Pedestrian-friendly
 - Mixed-use development

HOW:

What communications channels are most effective?

Primary channel- brooklynct.org, Web page provides the center for information and updates related to the planning process.

Secondary- Killingly Villager, Town newsletter, ESRI-Story maps, web-based surveys, WINY, Bulletin, Informational Booth at the Brooklyn Fair, Walktober

- Tools related to communication, education and feedback will include both online and physical marketing and survey information that will provide links to the overall website.
- Media and information should be provided in such a way to reach all aspects of the desired audience especially through any survey or feedback process.
- Surveys and information should be distributed both online and in hardcopy through both public agencies such as the town hall and library, nonprofits, Access Agency, Chamber of Commerce, NECTD, Senior Center, Religious institutions. etc.

WHEN:

What is critical window of opportunity?

Background information should be provided prior to survey or public input. Survey information should be collected and reviewed during the drafting of the plan.

Documentation of public outreach and communications efforts are included in Appendix A: Summary of Public Outreach.

Documentation of educational modules and public feedback surveys are included in Appendix B: Educational Modules and Surveys.

Population Demographics

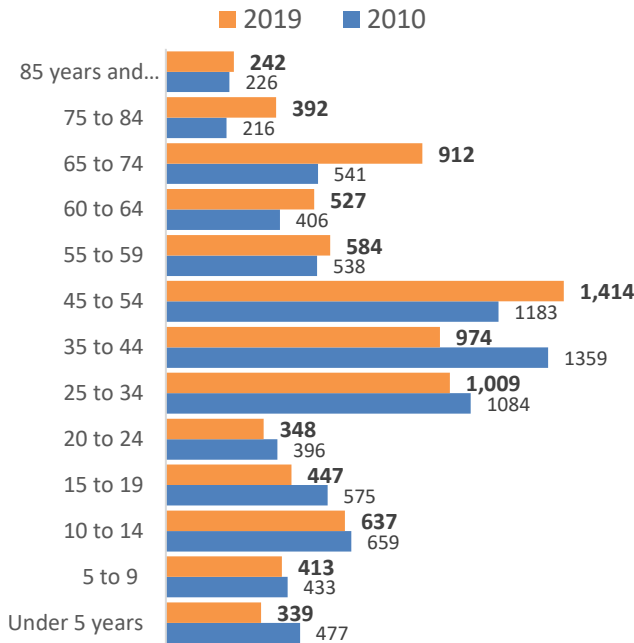

Brooklyn’s population has continually increased since 1970 by an average of 13% but has slowed since 2010 with only a 3% increase. Brooklyn is one of only two communities that have increased in population over the last ten years in the NECCOG region. The region lost 2% of its population within the same period. Data from the CT DATA center indicates that the Brooklyn will continue to grow over the next twenty years but at a slower rate as census counts for 2020 were approximately four hundred people short.

Brooklyn Population Trend

U.S. Census and CT State Data Center

Population by Age

U.S. Census 2010 and 2019 American Community Survey

Although the population has continued to increase, the age distribution of the population has some significant changes. Brooklyn, like much of the region and state, is getting older. The median age has increased almost six years since 2009. The 2019 ACS estimates the median age to be 44.3 years old compared to 38.4 in 2009. This is higher than both Windham County and the State of Connecticut which are both around 41 years old.

The largest increase in population has occurred in the 65-to-74-year cohort, an increase of 371. Overall Brooklyn has seen increases in all cohorts age 45 and above and decreases in populations age 44 and below. As the community ages, services and housing needs also change.

U.S. Census 2019 American Community Survey

The increase in population over the past decade includes an increase in the minority population. The white only population decreased by 5% while the Hispanic, other and multi race populations increased by 5.5%. The diversification of the population has occurred throughout the region and state even in towns with decreasing numbers.

The change in age distribution of the overall population is also reflected within the ten-year trend for householders. Householder 65 and over increased by 47% while under 44 years of age decreased by 12% and the 45-to-64-year cohort increased by 7.6%.

Change in Distribution of Age

U.S. Census 2010 and 2020 Decennial

Householder by Age

U.S. Census 2019 American Community Survey

In Brooklyn 73% of occupied housing units are owner occupied and 27% renter occupied.

Householders 65 and over make up 30% of all renters. This may be explained by the high number of senior housing developments within Brooklyn. The difference between renters and owners dramatically increases with age starting with those 45 and older.

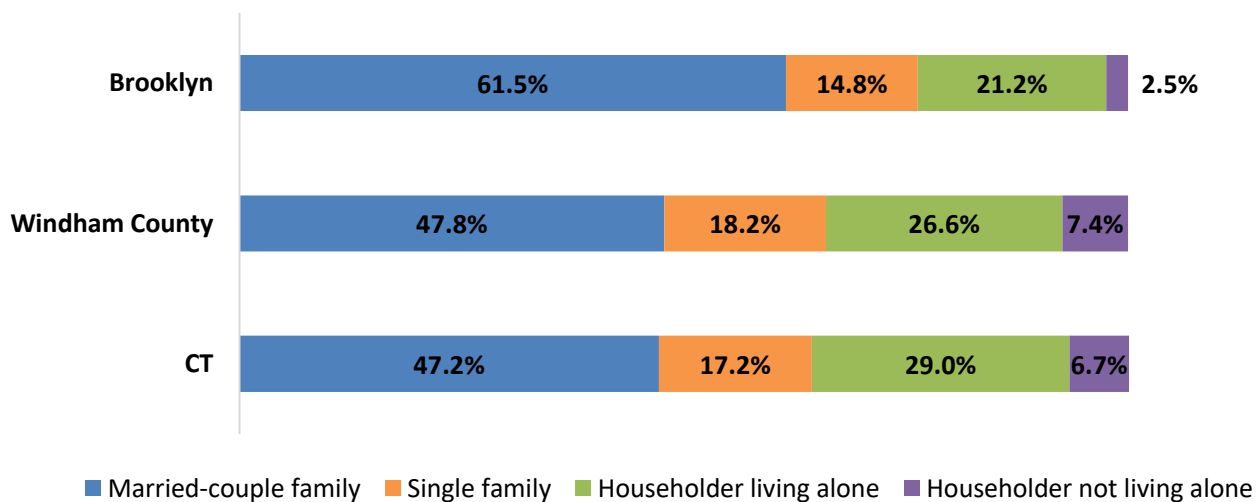

| HOUSEHOLD SIZE | Total | | Owner | | Renter | |
|-------------------------------|-------|-------|-------|-------|--------|-------|
| Occupied Housing Units | 2915 | | 2139 | 73% | 776 | 27% |
| 1-person | 618 | 21.2% | 283 | 13.2% | 335 | 43.2% |
| 2-person | 1,104 | 37.9% | 995 | 46.5% | 109 | 14.0% |
| 3-person | 619 | 21.2% | 417 | 19.5% | 202 | 26.0% |
| 4-or-more-person | 574 | 19.7% | 444 | 20.8% | 130 | 16.8% |

U.S. Census 2019 American Community Survey

Among renters, the majority are single person households (43.2%). Among owners, the majority are two person households (46.5%). In 2019, the average household size in Brooklyn was 2.62. For all households, family size was slighter higher at 2.93.

The percentage of married family households in Brooklyn is greater than Windham County and the state of Connecticut. Single family households are nearly equally split between male 7.8% and female 7%. Single person households are less than both the state of Connecticut and Windham County and are more likely to be renters.

Household Type

U.S. Census 2019 American Community Survey

Housing Types

U.S. Census 2019 American Community Survey

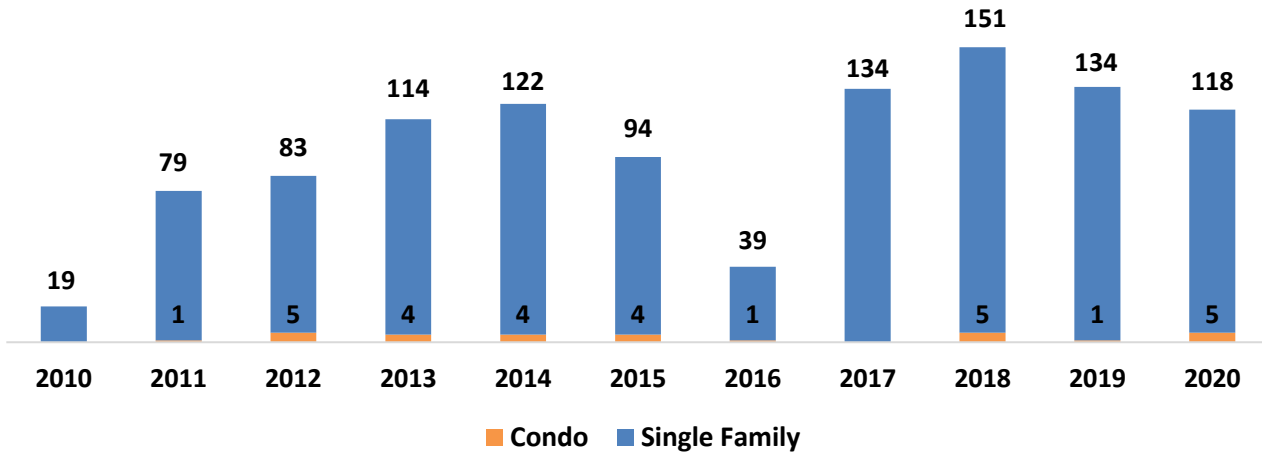

Housing units in Brooklyn are dominated by single family homes 79%, higher than Windham County and the state of Connecticut. Two units within a structure are significantly lower than both the state of Connecticut and Windham County. The percentage of Multi unit structures of 3 or more are in line with Windham County at 15.2% compared to 20.8% within the state.

Slightly more than half, 52% of units, have three or more bedrooms with 30% being less and 16.8% having more. The average single-family home in Brooklyn contains 1,677 square feet of living space with 6 rooms, 3 bedrooms and 1.5 bathrooms.

Seventy-one percent (71%) of units in Brooklyn were built earlier than 1960, making the housing inventory older than both the county and the state.

Housing Market Trends

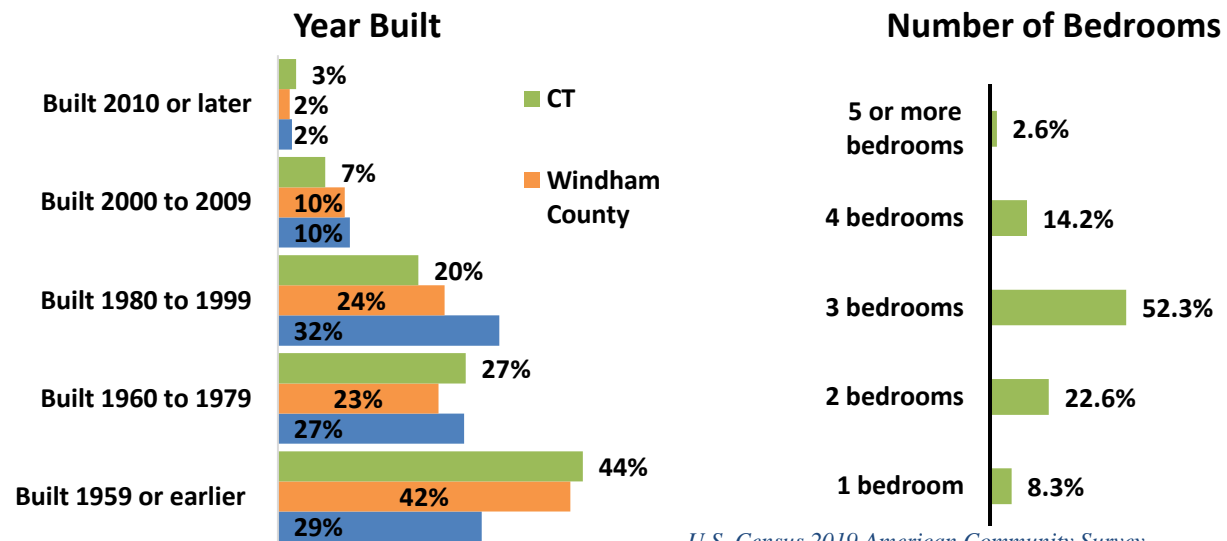

Single Family Sales

State of CT OPM

Single family home sales in Brooklyn increased between 2010 and 2014. Between 2015-2016, sales dropped but have since rebounded peaking in 2018. Recent trends since the beginning of the pandemic indicate a strong sales market but also increasing prices. Home sales are often above asking price. The future of the housing market remains uncertain.

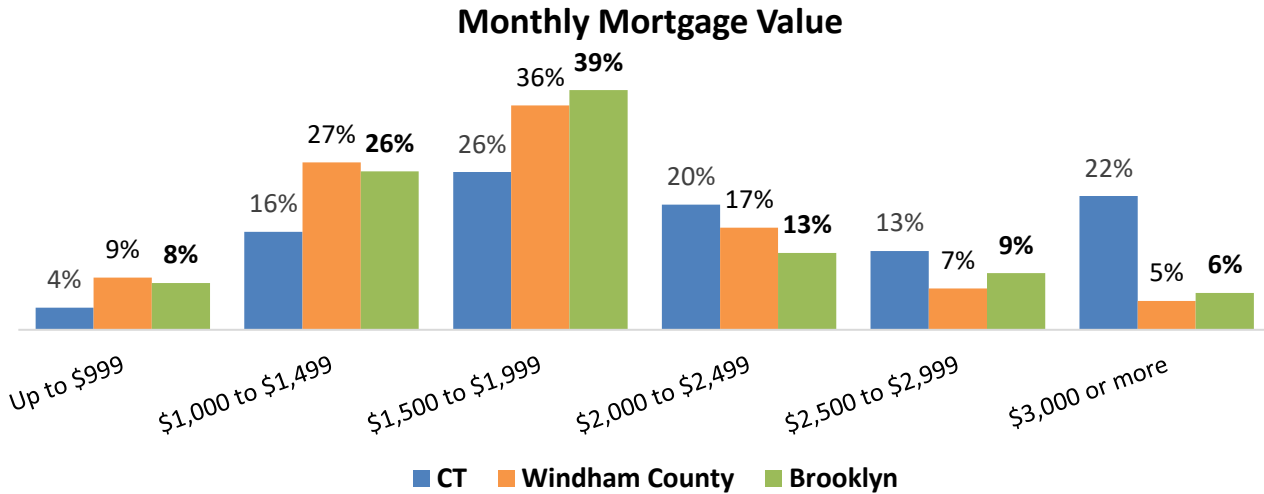

Over the last eight years median sale values have fluctuated between \$180,000 and \$210,000. Prices started to rise in 2016, \$216,000 but have recently climbed to \$245,000 in 2020. This may again be pandemic related with many able to work from home and looking to move away from urban areas harder hit by the virus and public health restrictions.

U.S. Census 2019 American Community Survey

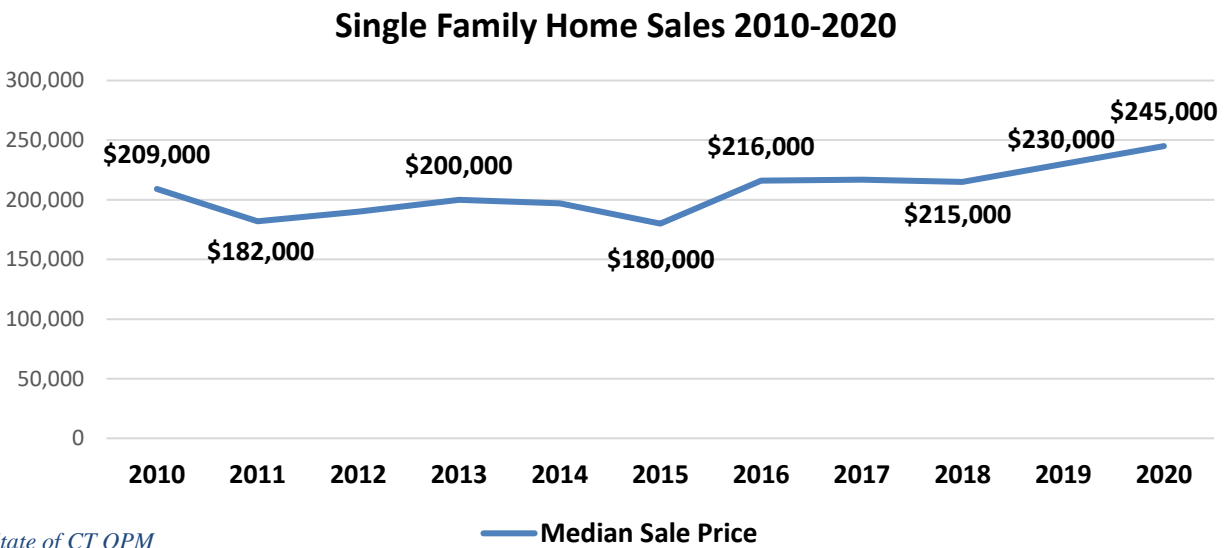

U.S. Census 2019 American Community Survey

Brooklyn overall has a higher percentage of households with a mortgage that pay under \$2,000 a month at 73%. That is in line with Windham County 72% and more than the state of Connecticut at 46%. The median mortgage value of homes with a mortgage in Brooklyn is \$1,792, that is slightly higher than Windham County \$1,685 but less than the state of Connecticut \$2,119.

U.S. Census 2019 American Community Survey

The median gross monthly rent paid by renters in Brooklyn is \$1,007 which is higher than Windham County \$946 but lower than the state of Connecticut \$1,180. Almost half 49% of renters in Brooklyn pay less than \$1,000 in rent a month with 90% paying less than \$1,499. Windham county has 56% paying less than \$1,000 and 92% less than \$1,499. U.S. Housing and Urban development Fair Market Rents for 2021 range from \$816 for an efficiency, \$1,036 for a two-bedroom and \$1,695 for a four-bedroom unit.

State of CT OPM

2019 Median Home Value

U.S. Census 2019 American Community Survey

| Final FY 2022 & Final FY 2021 FMRs By Unit Bedrooms | | | | | |
|---|------------|-------------|-------------|---------------|--------------|
| Year | Efficiency | One-Bedroom | Two-Bedroom | Three-Bedroom | Four-Bedroom |
| FY 2022 FMR | \$848 | \$854 | \$1,110 | \$1,388 | \$1,875 |
| FY 2021 FMR | \$816 | \$818 | \$1,036 | \$1,307 | \$1,695 |

U.S. Department of Housing

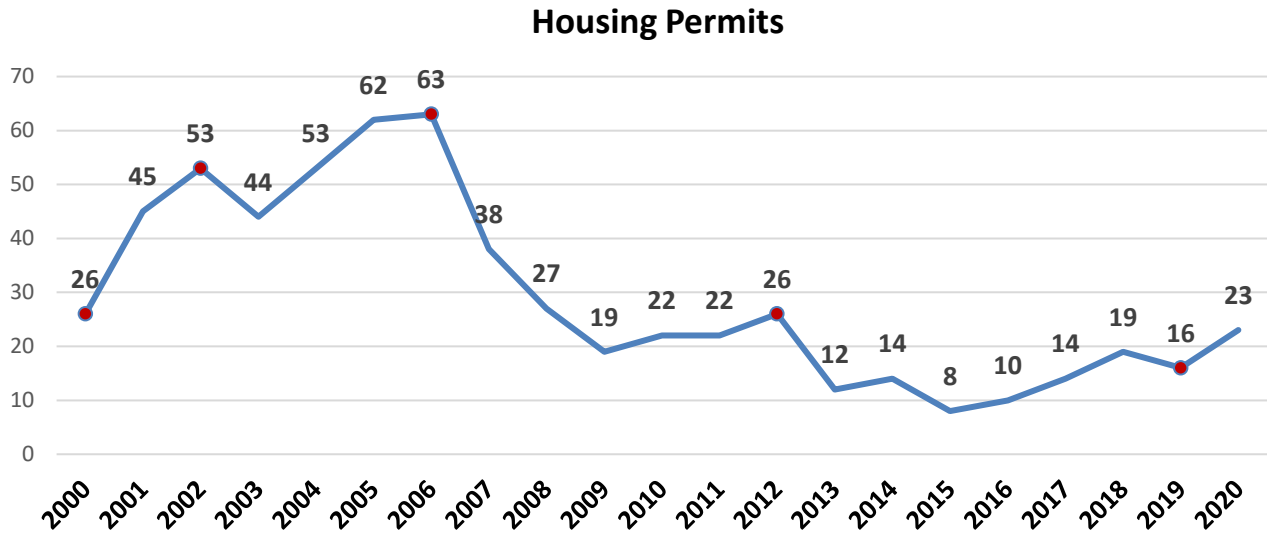

Median home values in Brooklyn in 2010 were \$267,000, \$36,000 more than the current value of \$230,600. This is still lower than the state of Connecticut \$275,400 but higher than Windham County \$204,400. The state of Connecticut and Windham County also had a decrease in home value since 2010 of about 7%.

Gross Rent

U.S. Census 2019 American Community Survey

Housing development in Brooklyn has decreased in the past ten years from its peak in 2006. The average number of permits issued is 20 since 2010. Most, if not all, have been for single family dwellings. Not all building permits that have been issued have resulted in units being constructed.

State of CT DECD

Housing Needs Assessment & Gap Analysis

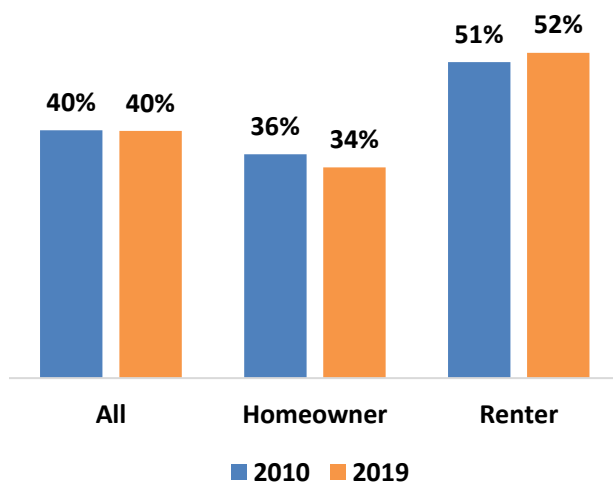

The U.S. Department of Housing and Urban Development (HUD) annually develops income limits for every metro area in Connecticut. Brooklyn is part of the Windham County Metro Area. Area Median Income (AMI) is calculated for each metro area using a formula based on the American Community Surveys five-year estimates. AMI is used to determine eligibility for various state and federal housing programs. The FY 2021 AMI for Brooklyn is \$83,200. Income limit categories for Low (80%), Very Low (50%) and Extremely Low (30%) are then calculated for family size.

| FY 2021 Income Limit Area | Median Family Income Click for More Detail | FY 2021 Income Limit Category | Persons in Family | | | | | | | |
|---------------------------------------|---|--|-------------------|--------|--------|---------------|--------|--------|--------|---------|
| | | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Windham County, CT HUD Metro FMR Area | \$83,200 | Very Low (50%) Income Limits (\$) Click for More Detail | 36,050 | 41,200 | 46,350 | 51,450 | 55,600 | 59,700 | 63,800 | 67,950 |
| | | Extremely Low Income Limits (\$)* Click for More Detail | 21,600 | 24,700 | 27,800 | 30,850 | 33,350 | 35,800 | 40,120 | 44,660 |
| | | Low (80%) Income Limits (\$) Click for More Detail | 55,950 | 63,950 | 71,950 | 79,900 | 86,300 | 92,700 | 99,100 | 105,500 |

U.S. Department of Housing

The Department of Housing and Urban Development (HUD) defines low-income families as families whose income does not exceed 80% of the median family income for the area. Very low-income families do not exceed 50% of the areas MFI and extremely low-income makes 30%.

Cost Burdened Households

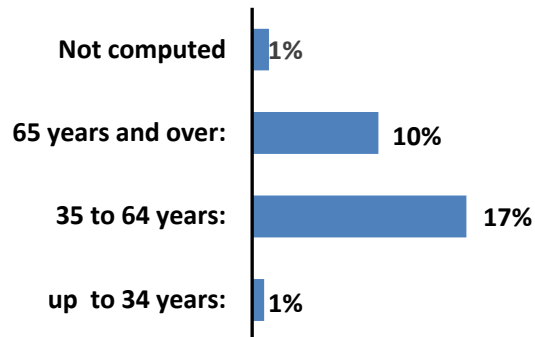

U.S. Census 2019 American Community Survey

Connecticut considers housing affordable if the cost is 30% or less of the household income for households making less than 80% of the State or median income, whichever is lower.

In Brooklyn, a family of four making less than \$79,900 per year could qualify for affordable housing programs. The 2019 ACS median income for Brooklyn is \$78,500 an increase of more than \$10,000 from 2010.

Cost Burdened Householders by Age

U.S. Census 2019 American Community Survey

A household is considered cost-burdened if it spends 30% or more of annual household income on housing costs. Housing costs for homeowners include utility, taxes, mortgage, insurance, and related payments for the home. Renters' housing costs are gross rental and related payments. Brooklyn has not seen much change in cost burdened households since 2010. More renters are cost burdened than homeowners by 20%.

HUD develops data to assist with planning for housing affordability known as the Comprehensive Affordability Survey (CHAS). CHAS is based on the ACS five-year estimates. The data was used to create a gap analysis that shows the number of low, very low and extremely low-income households and the demand for affordable housing compared to the supply of units within the community.

CHAS data for 2014-2018 shows that 40% of households in Brooklyn qualify as low income with 24% being very or extremely low income. Significantly more renters fall under the low-income category while owners make up the majority of very and extremely low-income households.

Brooklyn Affordable Housing Needs

Households in need of affordable housing

| Low Income | | Very Low Income | | Extremely Low Income | |
|------------------------------|------------|------------------------------|------------|------------------------------|------------|
| 50% to 80% of AMI | | 30% to 50% of AMI | | 30% or less of AMI | |

Housing Gap Analysis

The housing gap analysis shows a deficit in affordable homes priced below or at a level for extremely and very low-income individuals and families. There is also a slight deficit in rental units affordable to extremely low-income households and only a minimal surplus for very low-income individuals.

The gap analysis is intended to identify areas where there are significant differences in the supply and demand for affordable options for owners and renters. It is not intended to be an exact number of units to be developed.

Housing Gap Analysis: Family of 4

Owner Occupied Units

| Income Group | Max Home Value | Owner Occupied Units in Price Range | Owner Households in Income Range | Gap |
|----------------------------|-----------------------|--|---|-------------|
| Extremely Low (30% of AMI) | \$107,000 | 57 | 295 | -238 |
| Very Low (<50% of AMI) | \$179,000 | 501 | 475 | 26 |
| Low (<80% of AMI) | \$277,000 | 1260 | 600 | 660 |

Renter Occupied Units

| Income Group | Max Monthly Rent | Renter Occupied Units in Price Range | Renter Households in Income Range | Gap |
|----------------------------|-------------------------|---|--|------------|
| Extremely Low (30% of AMI) | \$781/month | 209 | 215 | -6 |
| Very Low (<50% of AMI) | \$1,286/month | 575 | 360 | 215 |
| Low (<80% of AMI) | \$1,997/month | 747 | 665 | 82 |

Infrastructure Assessment

Sustainability and Infrastructure

A geographic analysis of existing infrastructure and sustainable locations for housing development was conducted as part of educational segment #4: *How can housing be more affordable and sustainable?* (See Appendix B). Using the layer cake method, the geographic analysis identifies priority locations for sustainable housing based on the following factors:

Presence of

- Public water service
- Public sewer service
- Transit-accessible areas

Lack of

- Flood prone areas
- Wetland soils

From this mapping analysis, individual parcels may be identified and prioritized. Many of the highest-ranking parcels are in the Planned Commercial Zone, which does not allow housing as of this writing, or in the Village Center Zone, which limits the number of housing units per structure to three as of this writing.

Water Service

Brooklyn public water service is provided by the CT Water Company. There are approximately fourteen miles of water mains serving portions of Brooklyn, including:

- East Brooklyn neighborhoods, north of Route 6 (Bunny Lane, Fairway Drive, Westview Drive, Plaza Street, Day Street, Claudia Avenue, Paula Street, Greenway Drive),
- East Brooklyn neighborhoods, south of Route 6 (South Main Street, Tiffany Street, Middle Street, Elm Street, Front Street, South Street, Cote Drive, Pleasant View Drive, Kathleen Drive, Erin Drive, Fortin Drive, Ventura Drive, Bailey Street, Hamilton Avenue, Russell Avenue, Lockwood Street, Nelson Street, Proulx Street),
- Route 6 from East Brooklyn to the Town Green/Village Center (including Common Way),
- Route 6 from the Town Green/Village Center to the Brooklyn Correctional Institution at 59 Hartford Road, and
- Route 169 south to Route 205 and Vina Lane, extending to Creamery Brook Village and the Brooklyn Elementary and Middle Schools on Gorman Road.

Sewer Service

Brooklyn's sewer service area is largely coincident with the water service area with some notable exceptions.

- Approximately two miles of Route 6 between Brickyard Road and Common Way is a pressurized main that is not easily accessible to new users.
- In East Brooklyn neighborhoods (north), Bunny Lane, Fairway Drive, and Westview Drive have no sewer service.
- In East Brooklyn neighborhoods (south), the sewer service terminates at approximately 100 Fortin Drive and 350 South Street.
- In the Village Center, Fairgrounds Road, Tatnic Road, Harris Avenue, and Gunnar Drive have sewer service but no public water service.

The Brooklyn Water Pollution Control Authority (WPCA) maintains an Operating Agreement with the Killingly Water Pollution Control Authority that operates the sewage treatment plant. The current agreement authorizes the transfer of up to 350,000 gallons per day (gal/day) from Brooklyn to Killingly, of which approximately 250,000 gal/day is utilized. An additional 22,500 gal/day has been allocated to a future user and 77,500 gal/day is unallocated. The Killingly sewage treatment plant could potentially provide additional capacity upon revision of the Operating Agreement that is updated every two years.

Transit Service

Brooklyn transit service is provided by the Northeastern Connecticut Transit District (NECTD). The main Brooklyn Service is the Green Line with stops at: Walmart, Ocean State Job Lot, the Quinebaug Valley Regional Senior Center, Salem Village, and East Brooklyn. Additional bus routes with stops in Brooklyn include the Purple/Red line, the Orange line, and the Weekender service. There is a supplemental transit flex service area along Route 6 East (Providence Road) and Route 205 (Wauregan Road). Riders may call ahead and get picked up or dropped off by one of the regular buses anywhere within the transit flex service area.

Pedestrian Infrastructure

East Brooklyn is the most pedestrian-oriented neighborhood in Brooklyn, but pedestrian infrastructure is lacking in some areas. Sidewalks exist along the length of Route 6 from Walmart to the Quinebaug River/Killingly Town Boundary, approximately 1.3 miles in length. Additionally, sidewalks are maintained on all or portions of South Main Street, Tiffany Street, Front Street, Middle Street, Elm Street, Proulx Street, Day Street, Paula Street, and Greenway Drive.

The Village Center also has some walking infrastructure. There is a sidewalk along Route 6 from Mason Road to Prince Hill Road, a length of 1.3 miles that is well-used. A short section of sidewalk exists on Route 169.

Existing Regulations

Brooklyn is primarily a rural town, distinguished by single-family homes on lots over one acre in size, and includes historic colonials and capes, as well as traditional New England farmhouses and newer ranch houses. Multi-family housing is located primarily in the East Brooklyn neighborhood. Higher density is allowed in areas served by sewer and water, while the more rural areas have larger lots sizes required because of the lack of such facilities. Housing is regulated by subdivision and zoning regulations, wetlands regulations, health department regulations, and existing infrastructure.

Strengths and Weaknesses

Brooklyn's Zoning Regulations support the Plan of Conservation and Development which supports opportunities for a variety of housing types, densities, and cost levels; however, there are instances where the Zoning Regulations can make creating affordable housing more difficult either through increased permitting or through more intense regulation.

Strengths

- Brooklyn allows single family and duplex dwellings upon issuance of a Zoning Permit in almost every zone including R-10, R-30, RA, VC, NB, RB, and MMUD. This comprises 98% of the town of Brooklyn. The minimum lot size varies by zone.
- Attached Accessory Dwelling Units, commonly referred to as ADU's, are allowed upon issuance of a Zoning Permit under the duplex regulation.
- Elderly Housing has no minimum lot size and is allowed in R-10, R-30, VC, NB, and MMUD Zones. This comprises 12% of the town of Brooklyn.
- In 2019, the Multi-family Development regulations were updated to allow the conversion of an existing structures to multifamily provided they are on public sewer. There is no minimum lot size or maximum density except that multifamily development are limited to three units per structure in the VC Zone. This regulation allows for the conversion and renovation of many historic structures in East Brooklyn.
- The Paradise Lake Overlay Zone was adopted in 2019 to encourage investment in a disadvantaged neighborhood. While only comprising 0.5% of the town, this neighborhood is unique because it was divided into very small lots right before the Subdivision Regulations were adopted in 1967. The overlay zone was developed to provide relief from some of the dimensional requirements of the RA Zone. The Paradise Lake Overlay Zone has no minimum lot size and the setbacks have been reduced to 10'.

Weaknesses

- Both multi-family developments and elderly housing developments require a Special Permit.
- New Multi-family Developments are allowed in R-10, R-30, RA, VC, NB, RB, and MMUD but there is a minimum lot size of five acres. There are few parcels of that size within the water and service area. While there is no requirement to be on public water and sewer, it does impact the allowable density. The five-acre minimum makes multifamily development harder to accomplish.
- Detached Accessory Dwelling Units, ADU's located within a customary accessory building, currently requires a Special Permit. The Planning and Zoning Commission is anticipated to "opt-out" of the provisions in P.A. 21-29; however, they reserve the right to change this permitting requirement at their own discretion.
- Since 1992, Brooklyn has not allowed new single-width manufactured homes with a minimum dimension less than 22', defined by the Zoning Regulations as a "mobile home". The Zoning Regulations do allow mobile home in existence since 1972 to be replaced with another mobile home and/or enlarged up to fifty percent (50%) on a one-time basis. This is authorized by CGS 8-2; however, it does not contribute to the stock of "naturally affordable" housing.
- The RA Zone has the largest area (86%) and the largest minimum lot size (2 acres).

Recommendations

In the preparation of this plan, the need for two sets of recommendations became apparent. To comply with the Affordable Housing Plan requirement, a strategy to develop assisted and set-aside developments is required; however, to address the goals of the Brooklyn Plan of Conservation and Development more completely, a separate strategy to develop naturally occurring affordable housing and sustainable development is also needed. Some of the strategies overlap and, in such cases, they have been included in the former category.

Strategy to increase the number of assisted and set-aside housing developments

Assisted housing

- The all-volunteer Brooklyn Housing Authority (BHA) is responsible for the creation and preservation of housing for low- and moderate-income persons and families in Brooklyn. Much of its management responsibilities have been ceded to the professional staff at the Putnam Housing Authority. While such partnerships are often beneficial arrangements in small towns, there has been no apparent endeavor to develop new assisted housing units in Brooklyn in recent years.
 - A simple strategy would be to develop a mutual commitment to create a certain number of new assisted housing units in Brooklyn by a specific date.
 - Such units should (to the extent practicable): be in sustainable locations as determined by the infrastructure assessment, have a small environmental footprint, use sustainable practices and materials, and be sensitive to the town's natural resources.
 - Such units should maintain the historic and rural character of the town.

Set-aside developments

- Kathleen Drive (a 15-lot subdivision approved in 1987) is remarkable in that 6 of the 15 lots were purchased and deed restricted as affordable by a community development corporation whereas the rest are market rate. All lots integrate into a single, cohesive neighborhood. While not a requirement in 1987, Kathleen Drive could be a model for future, inclusionary subdivision approvals.
 - The Planning and Zoning Commission will consider the need for inclusionary zoning requirements in accordance with Conn. Gen. Stat. § 8-2i.
 - The Town of Brooklyn will seek to re-establish a relationship with the Northeastern Connecticut Community Development Agency to develop a mutual commitment to create a certain number of new deed-restricted units in Brooklyn by a specific date.

- Such units should (to the extent practicable): be in sustainable locations as determined by the infrastructure assessment, have a small environmental footprint, use sustainable practices and materials, and be sensitive to the town’s natural resources.
- Such units should maintain the historic and rural character of the town.

Other strategies to meet the housing goals of the Plan of Conservation & Development

Zoning recommendations for naturally occurring affordable housing

- Multi-family developments have a minimum lot size of five acres, creating an impediment to developing smaller-scale, multi-family developments on smaller lots.
 - The Planning and Zoning Commission will review the minimum lot size for multi-family developments.
- Detached Accessory Dwelling Units currently require a Special Permit and the Planning and Zoning Commission is anticipated to “opt-out” of the statutory requirement that ADU’s be allowed without a Special Permit.
 - The Planning and Zoning Commission will consider voluntarily removing the Special Permit requirement for detached ADU’s.
- New single-wide mobile homes are currently prohibited by the Brooklyn Zoning Regulations.
 - The Planning and Zoning Commission will consider the need for naturally occurring affordable housing such as single-wide mobile homes and manufactured “tiny” homes in the Zoning Regulations.
- Many of the most sustainable locations for housing development are in areas with public utilities but where housing is prohibited or very limited by the Zoning Regulations.
 - The Planning and Zoning Commission will consider the need for housing in the Planned Commercial Zone and the Village Center Zone.
- Incentive Housing Zones authorized by Conn. Gen. Stat. § 8-13m to 8-13x only require a 30-year deed restriction and therefore do not qualify as “set-aside developments”, but they are still a potential tool to achieving more affordable housing.
 - The Planning and Zoning Commission will consider the need for Incentive Housing Zones as authorized by statute.
- Zoning Regulations may include density bonuses or other incentives to encourage affordable and/or sustainable housing.
 - The Planning and Zoning Commission will consider all potential tools for achieving the housing goals of the Plan of Conservation and Development.

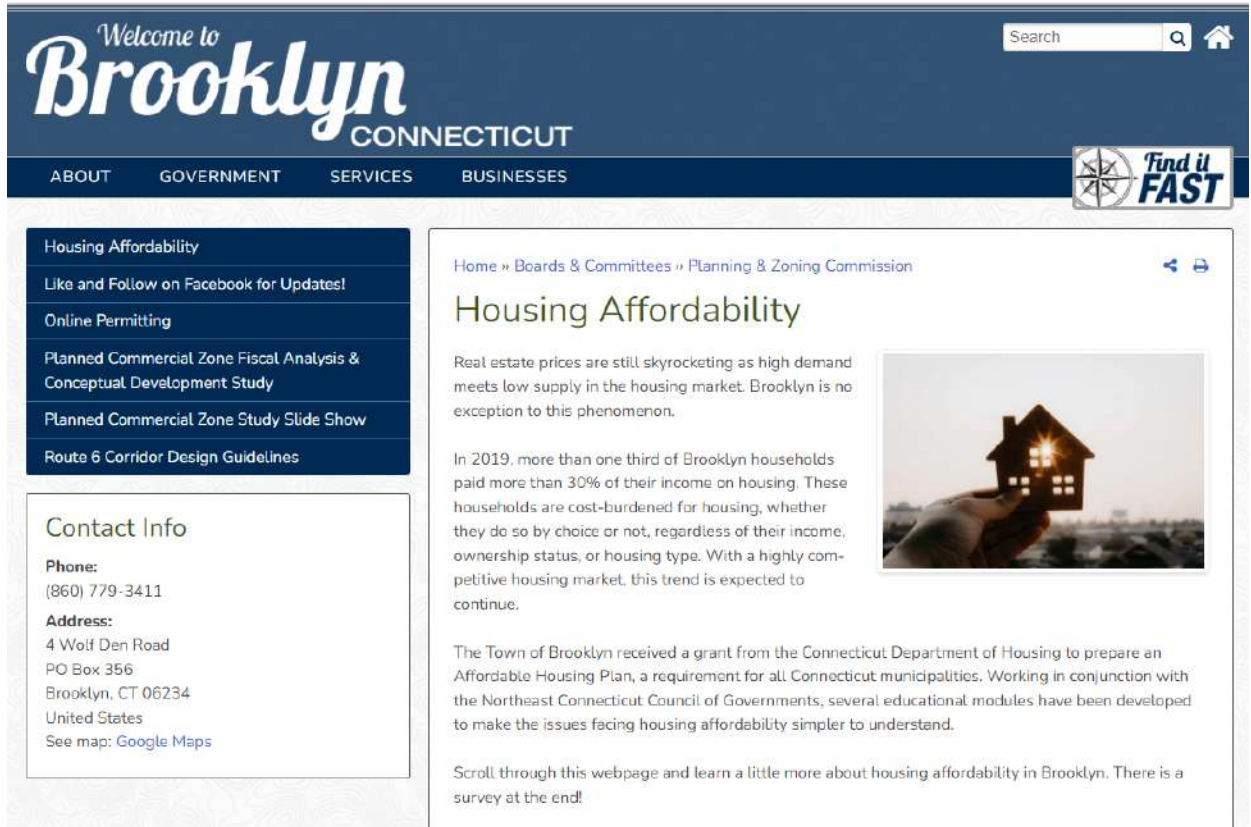

Other recommendations for naturally occurring affordable housing

- East Brooklyn, West Wauregan, and the Village Center contain older housing stock and neighborhoods that are identified as priorities for revitalization. Renovating older housing is an excellent way to meet municipal goals for affordable housing and sustainability.
 - Brooklyn could pursue grant opportunities and other measures or incentives to encourage the renovation of older housing stock for the purpose of providing safe, efficient, and affordable housing opportunities.

XXX

Appendix A: Summary of Public Outreach

- 1) 6-7-2021 – Created Housing Affordability page on Town of Brooklyn website.

- 2) 8-24-2021 – Published first in series of educational modules on housing affordability titled “Is My Housing Affordable?”, See Appendix B for all modules and survey results.
- 3) 8-27-2021 - Distributed information on housing issues at the Town of Brooklyn booth at the Brooklyn Fair. Engaged visitors in discussion regarding the different types of places they have lived. Handed out business cards with QR Code for informational website.

- 4) 10-22-2021 – Published second in series of educational modules on housing affordability titled “Why is Housing so Expensive?”, See Appendix B for all modules and survey results.

- 5) 11-16-2021 - Published third in series of educational modules on housing affordability titled “What Does Affordable Housing Look Like?” including Visual Preference Survey, See Appendix B for all modules and survey results.
- 6) 12-3-21 - Killingly Villager article “Brooklyn Launches Education Series on Housing Affordability”, pg.1.

Brooklyn launches educational series on affordable housing

BY JASON BLEAU
CONTRIBUTING WRITER

BROOKLYN – As the town of Brooklyn prepares its housing plan, a document required for every community in Connecticut, the town has launched a new online series meant to educate citizens about affordable housing.

According to Brooklyn Town Planner Jana Roberson, a series of four modules is being made available focusing on the facts of affordable housing, what it

means, how to identify it and how the housing market has become what it is today. The Northeastern Connecticut Council of Government (NECCOG) served as consultants in the production of the series.

“Housing prices are an issue that impacts every socioeconomic class,” Roberson said. “Many people pay more than they should for the housing they have no matter what they’re income bracket it, so what we

are doing is we’re looking at the issues facing housing costs and looking at ways to try and address that.”

The first two parts of the series have been made available on the Brooklyn Town Website. The first module allows citizens to self-determine if their current living situation counts as “affordable housing.” The module provides an equation to help determine if someone’s housing expenses exceed thirty percent of their yearly income,

a definitive limit for affordable versus unaffordable housing. The second module, updated in October, examines why housing has become so expensive.

“The modules do a lot to explain in simple language the issues that we’re all facing,” said Roberson. “It’s not hard to believe that when there’s a lot of competition in the market it favors people who have more money at their disposal. When you have a very competitive housing market like there

is right now there are winners and losers and there’s a lot more losers than there ever were.”

The two modules still to be released as of this writing are “What Does Affordable Housing Look Like?” and “How Can Housing be More Sustainable and Affordable?” The modules are available by visiting the Planning & Zoning Commission page at www.brooklynct.org and clicking the “Affordable Housing Plan” on the top of the left side tabs.

- 7) 12-9-21 – The Villager article was shared on the Facebook page for the Brooklyn Planning and Zoning Commission.
- 8) 12-17-2021 - Published fourth in series of educational modules on housing affordability titled “How Can Housing Be More Sustainable and Affordable?”, See Appendix B for all modules and survey results.
- 9) December 2021-February 2021 – Published Public Input Survey seeking feedback on affordable housing from the community, See Appendix B for all modules and survey results.

- 10) 1-26-2022 – Ad in Turnpike Buyer (a free weekly mailed to every address in Brooklyn) promoting the Housing Affordability webpage, modules, and surveys.

Planning for Housing Affordability

Real estate prices are still skyrocketing! More than 1/3 of Brooklyn households pay more than 30% of their income on housing.

The Town of Brooklyn and NECCOG are preparing an Affordable Housing Plan. Several educational modules have been developed to make the issues facing housing affordability easier to understand.

What do you think?
Please visit the web page and respond to the survey!

Brooklyn Housing Plan Website
<https://www.brooklynct.org/planning-zoning-commission/pages/housing-affordability>

- 11) January 2022 – Published article in the winter edition of the Town of Brooklyn digital newsletter.

Planning for Housing Affordability

Real estate prices are still skyrocketing as high demand meets low supply in the housing market. Brooklyn is no exception to this phenomenon.

In 2019, more than one third of Brooklyn households paid more than 30% of their income on housing. These households are cost-burdened for housing, whether they do so by choice or not, regardless of their income, ownership status, or housing type. With a highly competitive housing market, this trend is expected to continue.

The Town of Brooklyn received a grant from the Connecticut Department of Housing to prepare an Affordable Housing Plan, a requirement for all Connecticut municipalities. Working in conjunction with the Northeast Connecticut Council of Governments, several educational modules have been developed to make the issues facing housing affordability easier to understand.

What do you think? Please visit the web page and respond to the survey!

Appendix B: Educational Modules and Public Feedback Surveys

Housing affordability

Town of Brooklyn

August 24, 2021

Is My Housing Affordable?

How much of your income do you pay for a roof over your head? Have you ever figured it out?

Housing costs make up a big part of our personal expenses. Your housing is affordable if you pay no more than 30 percent of your income on housing costs, including electricity, heat, and water (www.hud.gov). Whatever your income, your housing should be affordable to you.

A simple calculation is to take your weekly wage, multiply by 52, divide by 12, and then multiply by 0.3. Let's say your weekly pay is \$600.

Example:

$$\$600 \times 52 = \$31,200$$

$$\$31,200 \div 12 = \$2,600$$

$$\$2,600 \times 0.3 = \text{\$780}$$

If your monthly housing cost is higher than this number, then your housing is not affordable.

The Housing Cost Burden

A household is considered cost burdened if they pay more than 30% of their annual income on housing costs. Nearly forty percent (39.6%) of households in Brooklyn are listed as cost burdened by the US Census. This affects homeowners as well as renters. Paying too much for housing leaves little to spend on other necessities.

Cost Burdened Households

US CENSUS 2019 American Community Survey

Housing Cost in Brooklyn

It is no surprise that the housing market has been red hot. Good if you are selling, bad if you are buying! How much do homes cost in Brooklyn? Currently the website Zillow has 14 listings for single family homes ranging from \$154,000 to \$850,00 with a median of \$362,000.

“Median” means that half of the sales are higher and half are lower.

The skyrocketing price of homes puts homeownership out of reach for many in Brooklyn.

Median Sales Price (Brooklyn Assessor)

Housing Wage

How much would someone need to make to afford a house in the Brooklyn area?

The "housing wage" is the hourly wage needed to afford a two-bedroom rental home without paying more than 30% of income on housing for areas within CT. The housing wage for the town of Brooklyn is \$19.92.

Brooklyn/Windham County

| | |
|-----------------------------|----------------|
| MINIMUM WAGE | \$13.00 |
| AVERAGE RENTER WAGE | \$12.04 |
| 2-BEDROOM HOUSING WAGE | \$19.92 |
| NUMBER OF RENTER HOUSEHOLDS | 13,949 |
| PERCENT RENTERS | 31% |

Out of Reach 2021 <https://reports.nlihc.org/oor/connecticut>

Fair Market Rent (FMR) is **the monthly rent a particular property type is likely to receive.**

Below are various monthly housing cost scenarios for Brooklyn and Windham County.

The **Town of Brooklyn** is starting the process of developing an affordable housing plan and updating its plan of conservation and development. As part of the process information will be posted on the town website <https://www.brooklynct.org/planning-zoning-commission/pages/affordable-housing-plan> and feedback solicited from community members.

Why is Housing So Expensive?

Home prices have skyrocketed, and the dream of homeownership is now out of reach for many. What is happening?

Town of Brooklyn
October 22, 2021

Housing markets are influenced by many different factors. Let's take a look at some of the things impacting housing prices.

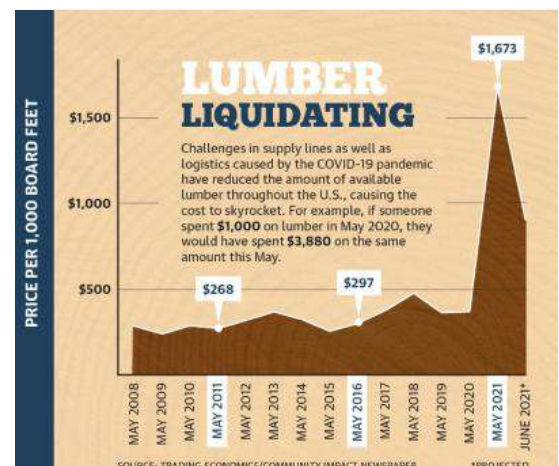

Brooklyn Assessor and American Community Survey U.S. Census

[Interactive: See Where Home Prices Are Skyrocketing in Connecticut](#)

[Supply Delays, Tight Workforce Shape Hot Housing Market in Connecticut](#)

Coronavirus

The global pandemic changed how housing markets work. The fight against coronavirus restricted mobility and labor and interrupted supply chains. In turn, this led to shortages of building materials. Lumber is a good example of how the pandemic has effected the cost of construction.

[The numbers are just absolutely crazy': Pandemic sends building costs soaring](#)

— and keeps contractors guessing

Coronavirus also changed housing demand. With new opportunities to work remotely, people started moving away from cities into suburbs and rural areas, increasing the demand for homes in those places.

COVID-19 Has Changed the Housing Market Forever. Here's Where Americans Are Moving (And Why)

Land Constraints & Zoning Regulations

Land constraints and zoning regulations also impact housing costs and impact the housing market.

Easily developed land is harder and harder to find because the best locations are usually developed first. Engineered septic systems and more intensive land clearing and grading on less-than-ideal building sites adds to overall building costs.

Land Sale Trends During Covid-19 And Beyond Blog

Local zoning regulations may require more land than is necessary to fit a home, well, and septic system. In Brooklyn's biggest zone (Residential-Agricultural), you must have at least two acres for a single-family home or duplex. A minimum of five acres is required for housing containing three or more dwelling units. While these requirements are intended to provide for the orderly development of the town, they increase the cost of building new homes and may lead to unintended consequences like increased travel times and habitat loss.

More Sensible Lot Sizes

High Demand, Low Supply

Rising demand and a low supply of available housing leads to a highly competitive housing market and increased sales prices for everyone.

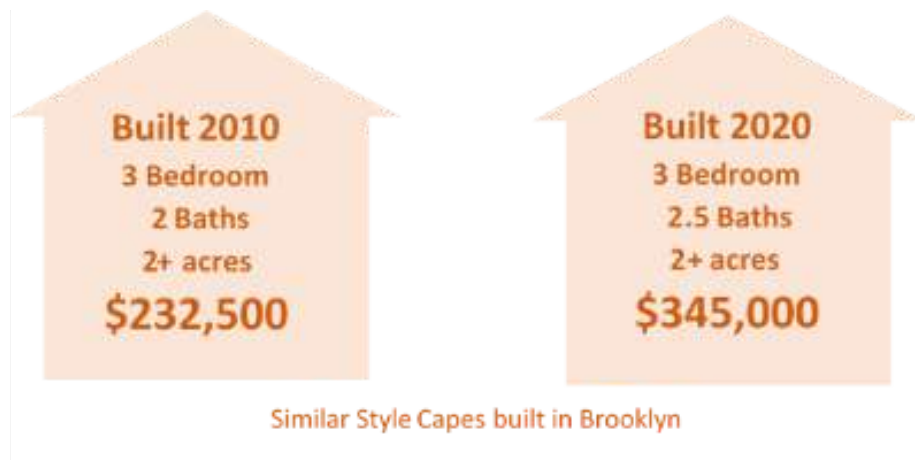

BROOKLYN, CONNECTICUT

ZONING REGULATIONS

PLANNING & ZONING COMMISSION

EFFECTIVE JULY 30, 2020

Source: Brooklyn Assessor Data

Interactive: Where CT's Real Estate Inventory is Shrinking Drastically

Competition & Housing Diversity

High competition favors those with higher incomes while moderate and lower income households are squeezed out of the housing market. The only housing affordable to low and moderate income families may be in need of repair or updating or is located in less desirable communities that do not provide the same opportunities as communities with higher median incomes.

Developers are more inclined to produce housing types that are easily built such as single family homes, resulting in little housing diversity. First time home buyers, single person households and seniors looking for different types of housing based on their stage of life and financial situation may be forced to look elsewhere for housing due to limited supply and fewer choices.

Investment Firms Aren't Buying All the Houses. But They Are Buying the Most Important Ones.

The competitive housing market effects everyone and does not accommodate the housing needs of the whole community. In the next segment, we will examine what affordable housing in Brooklyn might look like if the forces working against it were addressed.

The Town of Brooklyn is in the process of developing an affordable housing plan and updating its plan of conservation and development. As part of the process information will be posted on the town website <https://www.brooklynct.org/planning-zoning-commission/pages/affordable-housing-plan> and feedback solicited from community members.

What Does Affordable Housing Look Like?

Affordable housing can come in many shapes and sizes. Below are examples of the various housing types in Brooklyn.

Town of Brooklyn
November 16, 2021

What types of housing have you lived in?

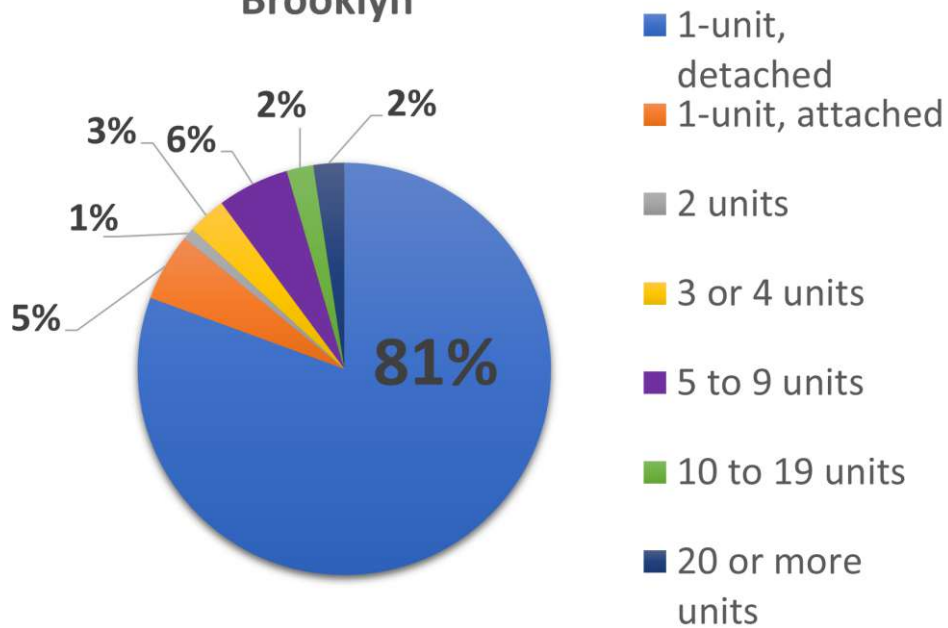

Our opinions are based on personal experiences as well as visual preferences of likes and dislikes. How someone sees the world may be influenced by where they have lived and the different types of housing that they have experienced.

For example, someone who has grown up in a apartment complex in an urban area may long for more space in the country or you could be the

country boy or girl that wants to be where the action is in the city.

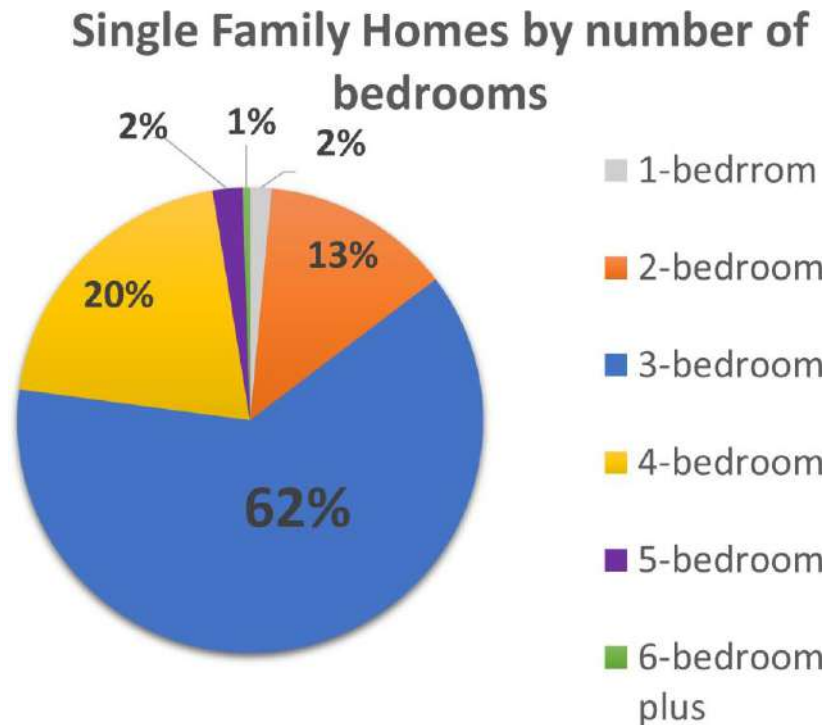

Different stages of life give rise to different types of housing situations. You may have been born in a mill village duplex, spent your teenage years in a suburban, single-family home, lived in a dorm room or apartment as a young adult, moved back to the suburbs with your growing family, and downsized after the children have left the nest. Healthy communities include housing for all of these situations.

Breakdown of Housing Units in Brooklyn

Housing Types

Single-family detached housing makes up the largest percentage of housing in Brooklyn at 81%. Housing size can vary from smaller, 1,000 square feet, 1-2 bedrooms to 2,500 square feet and 3 plus bedrooms. Older homes built before 1980 tend to be on the smaller side and may be considered more of a "starter home" for young families.

2019 American Community Survey

The average single-family house in Brooklyn contains 1,677 square feet of living space with 6 total rooms. 3.1 bedrooms and 1.6 bathrooms. The average lot size is 3 acres.

Single family homes in Brooklyn

Single-family attached are townhouse style units where three or more single-family units are connected side-by-side, each unit has its own front and rear access and no unit is located over another unit.

Approximate examples of townhouse styles in Brooklyn

Duplex or two-family housing units make up approximately 1% of the housing units in Brooklyn. Many historic mill villages within northeastern CT include duplexes built in the late 1800's that were used for employees.

Duplexes or Two-family homes in Brooklyn

Multifamily homes make up 9% of Brooklyn's housing stock with three or more units in one structure. Multifamily units may have separate access to the outside or be internal.

Multifamily housing developments in Brooklyn

Many large older homes have been converted to apartments containing three or more units while still fitting in with the neighborhood, be it rural or suburban.

Multifamily housing within historic structures

Multifamily housing developments may also include multiple stories and building layouts on one lot providing a variety of options and living styles.

Multifamily housing developments in Brooklyn

Please complete the following Visual Preference Survey to let us know what style of housing you think is most appropriate for the Town of Brooklyn.

How can housing be more sustainable and affordable?

Sustainable housing is best for the environment but can it be affordable, too?

Town of Brooklyn
December 17, 2021

Residential growth impacts our communities and natural ecosystems. Slow, scattered residential development can lead to a "death by 1,000 cuts" as each new home can lead to the loss of farmland and wildlife habitat. Some zoning policies force people to use more land and travel farther, making housing more expensive. Green building methods and alternative energy sources help, but sustainable, affordable housing starts with finding the most sustainable locations and using them efficiently.

Infill Development

One of the easiest ways to grow sustainably and affordably is to use existing infrastructure like water mains, sewer lines, and roads. For the most part, these areas already have some development so natural resources are less likely to be impacted. Filling in the gaps in existing development is called "infill". Infill development is the opposite of sprawl.

What is infill development?

Pros and Cons of Infill Development

Can there be infill in Brooklyn?

To get started, here is an outline of Brooklyn with major roads.

Here are areas where you can connect to [public water lines](#).

Here are areas with **public sewer connections**.

The darker green areas have water and sewer service and are located close to major roads. These are places where development is more **sustainable**.

Transit-Oriented Development

Another way to develop housing more sustainably and affordably is to develop in areas where cars are not required to get around. This means locating housing in areas where walking to the store or riding a bus is possible. This is often referred to as "transit-oriented" development, but the overall concept is to promote compact, mixed-use development suitable for walking, biking, and transit.

Transit-Oriented Development

NE CT Transit District - Routes & Schedules

Here are all the [transit stops](#) in Brooklyn. You can ride NECTD's green line, purple/red line, orange line, and the weekender service.

Light purple is the **transit flex service area**. You can call ahead and get picked up or dropped off by one of the regular buses anywhere within the light purple area.

By combining water and sewer service areas with transit service areas, we can identify places where development is more **sustainable**.

Environmental restrictions to development

Now that **sustainable areas** have been identified, it's time to show restrictions to development.

The blue areas are **flood prone** and cannot be used for housing.

The orange areas have **wet soils** that usually cannot be built on.

Once these areas have been removed, the actual places where in-fill could be located is more restricted, but there are still plenty of places that qualify!

Green Building Practices

One of the simplest green building practices is to renovate existing structures rather than building new ones and it also saves money! Much infill development could actually be achieved by renovating and expanding existing housing. When new construction is called for, there are lots of resources for building green, energy-efficient homes. There are several certifying standards for green building practices such as Energy Star, LEED, and Passive House Institute. Saving on energy is a great way to make housing more affordable.

| | | We need sidewalks as people want to walk places and drivers don't pay attention. People want to be close to things to do. Brooklyn doesn't have that. | |
| 1 | Feb 15 2022 10:16 PM | You have to go to Putnam or Willimantic or Mystic | |
| 2 | Feb 15 2022 08:13 PM | We don't need more houses if it means less fields and woods | |
| 3 | Feb 14 2022 07:44 PM | If you are not establishing a substantial sewer and public water network, lots should be no smaller than 2 acres | |

2021-2022 Public Input Survey

- 4 Feb 14 2022 07:23 PM The development needs for housing need to be balanced with the need to bring in moderate and high paying career options. Mixed income level housing is most appropriate rather than low income housing which appears to foster crime and attract less desirable residents.
- 5 Feb 14 2022 06:03 PM Brooklyn needs to focus on development in general not just housing. Brooklyn is a bedroom community that is why the tax burden is on the residents, not enough businesses or industry.
- 6 Feb 14 2022 05:42 PM Thank you
- 7 Feb 14 2022 05:30 PM We should not allow our town to go down the road of receiving government funding for housing as it will ruin our nice little town and bring more people who don't care about our town to it.
- 8 Feb 14 2022 04:14 PM Focus on the empty and blighted buildings already in town to improve housing before building more.
- 9 Feb 14 2022 03:50 PM Brooklyn is a nice community, but it needs to clean up the appearance of E Brooklyn (no blight, run down buildings) more sidewalks, and make the old town center a little more useful in terms of services, and lean heavily into the historic town appearance like other town in the area
- 10 Feb 14 2022 03:45 PM Taxes are rising every year, you will push seniors out of it continues.
- 11 Feb 14 2022 02:29 PM I worked very hard to be able to live in a place like Brooklyn. We don't need freeloaders and people who want to live above their means in town. I would love to go out and buy a brand new truck but I simply can't afford it so I don't buy it.... it's not a right to live in Brooklyn it's a privilege.
- 12 Feb 14 2022 12:57 PM I think plans for multi generational houses should be considered. Many families have aging loved ones that do not want to put them in nursing homes. No one wants to put them in there to chance them dying alone again. Options to put a permanent structure on land should be allowed as long as it keeps with the ascetic of the town. This means less large apartment buildings might be needed but still keep the town pretty.
- 13 Feb 14 2022 11:03 AM Less zoning and taxes. Get more business so we can have a lower mil rate

2021-2022 Public Input Survey

| 14 Feb 14 2022 10:16 AM | <p>Brooklyn has always been low income area. Fix up these apartments in a few years they are destroyed and the cycle happens again. Who pays the guy that owns a house car n pays his bills. No ty to low income housing of any kind</p> |
| 15 Feb 14 2022 09:35 AM | <p>Housing options have been poorly managed with focus on whatever for profit developers can get away with - examples include recent Day Street development, the nonsense surrounding the condominiums off of School Street and concerns in the area of Tatnic and Tripp Hollow as well as the old golf course plans. There has been a definite lack of leadership surrounding long range planning and potential impact of said developments - traffic, wildlife, water flow and fresh water and septic availability. In addition, enforcement and monitoring have been seriously lacking - recent Church Street infractions come to mind. The terms cronyism and lack of transparency come to mind upon perusal of public meeting minutes over recent years. To be fair, housing is not the only area of town management where these issues are of concern.</p> |
| 16 Jan 26 2022 07:37 PM | <p>Housing of people capable of finding a living wage in Brooklyn and or close proximity</p> <p>My family has been a part of the Litchfield Housing Trust in a wide variety of capacities, as residents and Directors since 1992. I am willing and interested in sharing ideas about what has been a successful model for affordable housing in a rural CT community. You may reach me at</p> |
| 17 Jan 24 2022 09:50 PM | <p>Better public transportation options should be considered before affordable housing.</p> |
| 18 Jan 24 2022 12:23 AM | <p>People move to places like Brooklyn to get away from affordable housing areas. We are willing to pay more so we live where there are a lot fewer options for many things. Affordable housing usually means higher crime rate.</p> |
| 19 Jan 23 2022 08:16 PM | <p>Not what we want here.</p> |

2021-2022 Public Input Survey

| | | |
|----|----------------------|--|
| 20 | Jan 23 2022 08:15 PM | It's important to keep some towns a bit more affordable to allow a more comfortable living for those that can afford it. We specifically moved to Brooklyn versus other neighboring towns due to its housing costs and knowing that a certain population would be living here too. |
| 21 | Jan 22 2022 03:04 PM | We have enough low income housing. We are a rural town and need no more low income housing |
| 22 | Jan 21 2022 11:09 PM | Low income housing brings crime and higher taxes, we do not need any more |
| 23 | Jan 21 2022 05:38 PM | No affordable houseing We don't need it. Take care of the empty commercial space first. We don't need to look like Norwich. An have Norwich problems. We are a agriculture town. Keep building dumb shit, an in the long run we will lose our fairgrounds to build more houses. People can get jobs anywhere. But you only have this one town, an the people. We have Quebec square. Which was a eye sore for the longest time. You put affordable housing in, beauty an appeal. We were designed as a senic town. More people more traffic. An more people who will do dumb shit. We have enough problems. Focus on the problems we do have first. |
| 24 | Jan 21 2022 01:45 PM | first. |
| 25 | Jan 21 2022 11:16 AM | Housing affordability is certainly a major concern everywhere, thank you for taking this project on. |
| 26 | Jan 20 2022 09:33 PM | None |

2021-2022 Public Input Survey

I feel that there should be more open forums or surveys for town residents, especially those of us who have transplanted from other states. Most of us left other states due to the expansions in our former hometowns, whether those reasons to leave be affordable housing or tourist focus of the area, which in turn raised taxes and created an environment of perpetual calous local government behavior to constituents need due to being blinded by the quick none lasting flow of monies the town recieved. We have seen what expansion has done to our former communities and chose Brooklyn for it rural roots, for land, for privacy, small town charm, and most importantly, Brooklyn being extremely affordable as it is now. I'm sure many of us would agree that if we wanted easy access to transportation, shops etc, we would have stayed where we came from and not move to the sticks. I love this town and it would be a shame to see it lose its charm.

With that said, since the state has their fingers in this due to grant money and what the state wants they get, sadly. Never put the cart before the horse, this town needs jobs before housing. Town center could be a gorgeous stereotypical New England town. You can have all the housing in the Quiet Corner, if you don't have jobs you pigeon hold yourself. If you don't have a nice area to attract people, you have empty housing and the individuals who do move in can make the area less safe.

I voiced my opinion, I know it won't change anything but thanks for the soap box.

27 Jan 20 2022 08:33 PM

Any low income housing will be vehemently opposed by the citizens of Brooklyn.

28 Jan 20 2022 03:18 PM

Brooklyn already has housing options within town that are underutilized and options that are under serviced in the terms of basic maintenance and upkeep. Let us turn are focus to the housing that currently exists before attempting to unnecessarily expand into the few remaining natural preserves that are left.

29 Jan 20 2022 02:17 PM

2021-2022 Public Input Survey

- Brooklyn is a rural town with lots of nature and should stay that way. Reduce the number of acres needed to build different types of multi family homes in some areas. We do not need or want large, government funded housing projects run by slum lords. They never turn out well for residents or neighbors.
- 30 Jan 20 2022 09:07 AM I am fully against ANY FEDERAL FUNDS SWAYING THIS TOWN TO ACCOMMODATE ANY LOW INCOME DWELLINGS HERE!!!
- 31 Jan 20 2022 08:12 AM To lower our tax base we need more businesses. We eventually will need a high school and business will offset its cost. Our zoning regulations need to be less restrictive. We can stay "country" in specific areas but we need to be inviting to future businesses.
- 32 Jan 20 2022 07:38 AM We moved here because of the rural setting and the smaller population and the space. It seems like the town is hell bent on ruining that. KEEP BROOKLYN RURAL
- 33 Jan 20 2022 02:01 AM Seniors should get a break on taxes.
- 34 Jan 20 2022 12:55 AM
- As stated, \$19.92 is the hourly wage needed to afford a two-bedroom rental home without paying more than 30% of income on housing for areas within Brooklyn. Most wages in Brooklyn and the immediate area are below the housing wage. Therefore, existing housing should be utilized/redeveloped to revitalize our community and make use of obsolete and vacant land/properties.
- 35 Jan 19 2022 11:49 PM I am very happy to see that we are finally starting to address this problem!
- 36 Jan 18 2022 05:00 PM

2021-2022 Public Input Survey

I live in affordable housing and the reason it is affordable is because it accepts funding from HUD. It is a rental unit so I know affordable housing looks like. Most of the pictures in your survey are not affordable using the 30% of your gross income standard.

As an example, on Proulx Street one home own subdivided his lot ending up with THREE houses on a one acre lot. Is that Brooklyn's answer to housing issues??

If I understand this package of information correctly, you are saying that the best place to build new affordable housing would be in places that have water, sewer and access to transportation. The maps show that on the Route 6 area. Wouldn't that be better used for businesses that want to come to our area?

You can't avoid the attitude in Brooklyn that rental housing is a "second class" option for everyone who can't afford a traditional home with a 30 year mortgage. I know how the locals look at all of us who live in East Brooklyn. If there was a way where Brooklyn could divorce East Brooklyn, it would have been done. Let's face it...we make people uncomfortable . They don't like to "see" local poverty , especially not in their back yard.

To sum it up, what ever goal you are looking to achieve with affordable housing will never happen in Brooklyn. Call me a cynical, but you can't address affordable housing until you address the causes and problem of rural poverty.
